irya DEVELOPERS

To
The **Superintendent Engineer,**
Vikarabad circle.

Subject: Request for Sanction of Power Supply through **11 kV Line** – 250 KVA CMD with Additional 1250 KVA CMD on Turnkey Basis

Respected Sir,

We, **IRYA Developers**, a **construction company**, are undertaking a proposed construction project and respectfully submit that an initial power supply of **250 KVA CMD** is required to commence and execute the preliminary stages of construction works, including site development, operation of construction machinery, and other essential construction-related activities.

Further, considering the increased power requirement during the advanced stages of construction, an **additional load of 1250 KVA CMD** will be required after a period of **18 months**. This additional requirement is intended to support heavy construction equipment, batching plants, lighting systems, and other allied infrastructure.

Accordingly, we request sanction of power supply through an **11 kV HT line with a dedicated feeder on turnkey basis**, as detailed below:

- Initial Load: **250 KVA CMD**
- Additional Load (after 18 months): **1250 KVA CMD**
- **Total Proposed Load: 1500 KVA CMD**

We humbly request your good office to kindly accord approval and sanction for the above-mentioned power supply through an **11 kV line on turnkey basis**, enabling us to execute the project as per the proposed schedule.

We assure your good office that we shall strictly comply with all applicable terms, conditions, safety norms, and technical requirements as prescribed by the department from time to time, and we are willing to bear all applicable charges as required.

Thanking you and looking forward to your kind consideration.

Yours faithfully,
For **IRYA Developers**
