To,

Commissioner of Industries.,

TG -iPass,

Telangana.

Sub : Reg data correction in the Factory plan approval from Inspector of factories.

Dear Sir,

We would like to bring to your kind attention that in our TG-iPASS application, the connected load was inadvertently entered as **520 HP**, whereas the actual connected load is **1068 HP**.

We request you to kindly make the necessary correction in the records to reflect the accurate connected load.

Note: The factory plan layout uploaded by us clearly mentions the connected load as **1068 HP**.

We sincerely request your support in updating the data accordingly.

Thank You.

Yours Sincerely,

MYK Arment India Private Limited.
